

American DJ basic controller for various lighting fixtures.

UC 3 controller enables manual selection between various lighting programs and effects modes without using DMX controller.

Functions vary with different devices.

Function selection:

This button implements a variety of built-in programs (eg. strobe, chase, various X/Y moving pattern, etc.)

Mode selection:

This button allows choosing different run modes: (eg. audio, fast, slow, etc.)

Stand-by selection:

This button switches the device into a stand-by mode. The same function as 'blackout' in DMX controllers.

Specifications:

- Cable length: 10m with 1/4 stereo plug
- Dimensions (LxWxH): 90x60x20
- Weight: 0.45kgs.

Compatible with many AmericanDJ lighting fixtures (eg. Revo, X-Plus, Galaxian Laser series, etc.)

Please make sure that the product according to the description is compatible with UC 3 controller.
