

## Mounting the Truss Adaptor

The Truss Adaptor will arrive with the saddle brackets facing inwards. These must be reversed to use the adaptor correctly.

1. Remove the retaining screws from both sides of the truss adaptor.
2. Remove the saddle brackets and hardware.
3. Invert the saddle brackets and choose the mounting distance needed. Slide the safety pin through the hole and secure with R-clips.
4. Reinstall the retaining screws and hardware and tighten as necessary.

01 - Saddle brackets  
02 - Retaining screws

03 - Safety pins  
04 - R-clips

05 - 35mm mounting tube  
06 - Tightening knob

In the box:  
**1 x stand adaptor &  
1 x user manual**

## To install onto the Winch Stand:

1. Lower the mounting tube onto the mast of the Winch Stand.
2. Hand-tighten the tension knob until snug, being careful not to damage the mast.

## To install truss onto the Truss Adaptor:

1. Arrange the truss rungs into the saddle brackets.
2. Secure in place using the safety pins and R-clips.
