

EQUINOX

Twin Shot

User Manual

Order code: EQLED403

WARNING

FOR YOUR OWN SAFETY, PLEASE READ THIS USER MANUAL CAREFULLY BEFORE YOUR INITIAL START-UP!

- Before your initial start-up, please make sure that there is no damage caused during transportation.
- Should there be any damage, consult your dealer and do not use the equipment.
- To maintain the equipment in good working condition and to ensure safe operation, it is necessary for the user to follow the safety instructions and warning notes written in this manual.
- Please note that damages caused by user modifications to this equipment are not subject to warranty.

IMPORTANT:

The manufacturer will not accept liability for any resulting damages caused by the non-observance of this manual or any unauthorised modification to the equipment.

- Never let the power cable come into contact with other cables. Handle the power cable and all mains voltage connections with particular caution!
- Never remove warning or informative labels from the unit.
- Do not open the equipment and do not modify the unit.
- Do not connect this equipment to a dimmer pack.
- Do not switch the equipment on and off in short intervals, as this will reduce the system's life.
- Only use the equipment indoors.
- Do not expose to flammable sources, liquids or gases.
- Always disconnect the power from the mains when equipment is not in use or before cleaning! Only handle the power-cable by the plug. Never pull out the plug by pulling the power-cable.
- Make sure that the available mains supply voltage is between 220~240V AC, 50/60Hz.
- Make sure that the power cable is never crimped or damaged. Check the equipment and the power cable periodically.
- If the equipment is dropped or damaged, disconnect the mains power supply immediately and have a qualified engineer inspect the equipment before operating again.
- If the equipment has been exposed to drastic temperature fluctuation (e.g. after transportation), do not connect power or switch it on immediately. The arising condensation might damage the equipment. Leave the equipment switched off until it has reached room temperature.
- If your product fails to function correctly, stop use immediately. Pack the unit securely (preferably in the original packing material), and return it to your Pro Light dealer for service.
- Only use fuses of same type and rating.
- Repairs, servicing and power connection must only be carried out by a qualified technician. **THIS UNIT CONTAINS NO USER SERVICEABLE PARTS.**
- This fixture is for professional use only - it is not designed for or suitable for household use. The product must be installed by a qualified technician in accordance with local territory regulations. The safety of the installation is the responsibility of the installer. The fixture presents risks of severe injury or death due to fire hazards, electric shock and falls.
- **WARRANTY:** One year from date of purchase.

OPERATING DETERMINATIONS

If this equipment is operated in any other way, than those described in this manual, the product may suffer damage and the warranty becomes void. Incorrect operation may lead to danger e.g: short-circuit, burns and electric shocks etc.

Do not endanger your own safety and the safety of others!

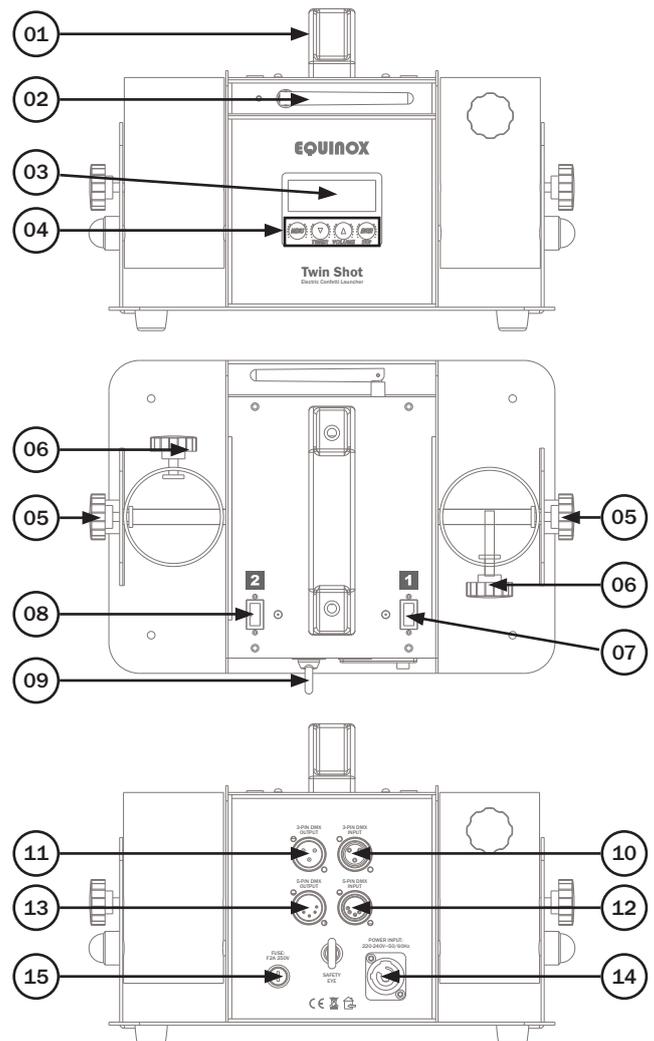

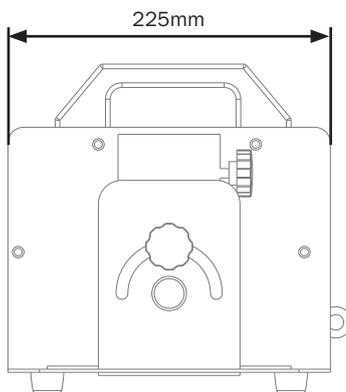

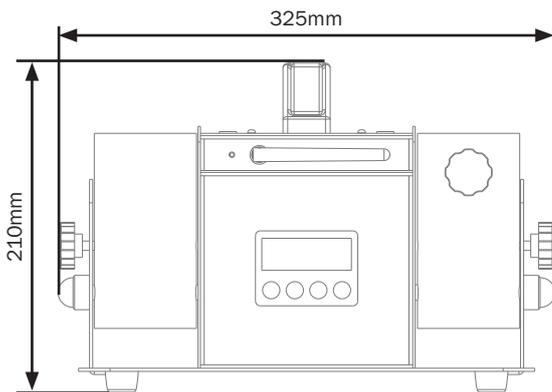

Incorrect installation or use can cause serious damage to people and/or property.

Twin Shot

Twin Shot accepts most brands of electric confetti and streamer cartridges. Users can choose whether to launch one or two cartridges using the supplied wireless remote control, on-board 4 button LCD menu system or DMX. Both launch pods projection angles can be independently adjusted by 160°. Mounting holes are also included on the base of the unit for truss applications.

- For use with 50cm and 80cm electric cannons
- Allows 2 electric confetti/streamer cannons to be fired separately or simultaneously
- DMX channels: 3
- Manual (via wireless remote) and DMX modes
- M10 rigging points for truss mounting
- 4 push button menu with LCD display
- PowerCON input
- 3-Pin XLR input/output
- 5-Pin XLR input/output

Specifications	
Power consumption	60W
Power supply	220-240V, 50/60Hz
Fuse	F2A 250V
Dimensions	210 x 325 x 225mm
Weight	5.8kg
Order code	EQLED403

- 01 - Carry handle
- 02 - Antenna
- 03 - LCD display
- 04 - Function buttons
- 05 - Cannon output holder angle adjustment knobs
- 06 - Cannon output holder adjustment knobs
- 07 - Confetti/streamer cartridge input 1
- 08 - Confetti/streamer cartridge input 2
- 09 - Safety eye
- 10 - 3-Pin DMX input
- 11 - 3-Pin DMX output
- 12 - 5-Pin DMX input
- 13 - 5-Pin DMX output
- 14 - PowerCON input
- 15 - Fuse F2A 250V

In the box: **1 x fixture,**
1 x power cable,
1 x wireless remote
& 1 x user manual

Operation:

When the unit is powered up the display will show **“Ready”** indicating the machine is ready to use.

DMX mode:

To access the DMX address, press the **“MENU”** button until **“DMX 512 Address”** is shown on the LCD display. Now use the **“UP”** and **“DOWN”** buttons to set the required DMX address. Press the **“ENTER”** button to confirm the setting.

Channel	Value	Function
CH1	000-010	No function
	011-255	Output 1 & 2
CH2	000-010	No function
	011-255	Output 1
CH3	000-010	No function
	011-255	Output 2

Manual (wireless remote) operation mode:

To enable manual (wireless remote) operation, press the **“MENU”** button until **“Wireless Set”** is shown on the LCD display. Now use the **“UP”** and **“DOWN”** buttons to select **“ON”**.

Press the **“ENTER”** button to confirm the setting.

Once the wireless remote operation has been enabled you can now set the functions of each button on the remote.

To set the functions of the remote buttons, press the **“MENU”** button until **“Channel 1 set:”** is shown on the LCD display. Now use the **“UP”** and **“DOWN”** buttons to select the function for button 1 on the remote between **“1”** (output 1 only), **“2”** (output 2 only) or **“1 2”** (output 1 and 2 together).

Press the **“ENTER”** button to confirm the setting.

Repeat the above for **“Channel 2 set:”**, **“Channel 3 set:”** and **“Channel 4 set:”**.

To disable manual (wireless remote) operation, press the **“MENU”** button until **“Wireless Set”** is shown on the LCD display. Now use the **“UP”** and **“DOWN”** buttons to select **“OFF”**. Press the **“ENTER”** button to confirm the setting.

Ensure the handheld remote is fitted with a good quality battery (A23 12V Alkaline).

Please note: the remote included with the unit comes paired. If a replacement remote needs to be paired with the unit please follow the instructions below.

Firstly ensure that manual (wireless remote) operation is enabled. Now power the unit OFF and back ON again. When the display shows **“Wireless Setup >>>”**, press any button (1, 2, 3 or 4) on the remote for 1 second. Any previously paired remotes will be cleared from the units memory and the new remote will be paired. Once complete the display will show **“Wireless Setup OK”**.

Installation:

Do not orientate the output nozzle directly in the direction of the audience's eyes.

In order to create the best effect, there should be a distance between the unit and the audience of at least 5m.

This unit is constructed for a free standing or hanging installation. If the unit is to be installed overhead, please follow the safety instructions below:

Rigging installation:

The installation has to be built and constructed in a way that it can hold 10 times the weight of the unit(s) to be installed for 1 hour without any deformation.

The unit must always be secured with a secondary safety attachment, e.g. an appropriate catch net or safety wire. The secondary safety attachment must be constructed in a way that no part of the installed unit can fall down if the main attachment fails.

When rigging, derigging or servicing, do not allow personnel to be directly underneath the unit.

The operator must always make sure that the safety-relating and machine-technical installations are approved by an expert before operation for the first time and after any further changes are made.

The operator has to make sure that the safety-relating and machine-technical installations are approved by a qualified person once a year.

Replacing the fuse:

Only replace the fuse with a fuse of same type and rating.

Before replacing the fuse, disconnect from the mains, see the following for procedure:

Step 1: Open the fuse holder on the rear panel with a suitable screwdriver.

Step 2: Remove the old fuse from the fuse holder.

Step 3: Install the new fuse in the fuse holder.

(Replacement fuses should be of the same value as originally supplied)

Step 4: Replace the fuse holder in the housing.

Should you need any spare parts, only use genuine parts.

If defective, please dispose of the unusable unit in accordance with the current legal regulations.

Should you have any further questions, please contact your dealer.

Setting the DMX address:

The DMX mode enables the use of a universal DMX controller. Each fixture requires a “start address” from 1- 512. A fixture requiring one or more channels for control begins to read the data on the channel indicated by the start address. For example, a fixture that occupies or uses 7 channels of DMX and was addressed to start on DMX channel 100, would read data from channels: 100, 101, 102, 103, 104, 105 and 106. Choose a start address so that the channels used do not overlap. E.g. the next unit in the chain starts at 107.

DMX 512:

DMX (Digital Multiplex) is a universal protocol used as a form of communication between intelligent fixtures and controllers. A DMX controller sends DMX data instructions from the controller to the fixture. DMX data is sent as serial data that travels from fixture to fixture via the DATA “IN” and DATA “OUT” XLR terminals located on all DMX fixtures (most controllers only have a data “out” terminal).

DMX linking:

DMX is a language allowing all makes and models of different manufactures to be linked together and operate from a single controller, as long as all fixtures and the controller are DMX compliant. To ensure proper DMX data transmission, when using several DMX fixtures try to use the shortest cable path possible. The order in which fixtures are connected in a DMX line does not influence the DMX addressing. For example; a fixture assigned to a DMX address of 1 may be placed anywhere in a DMX line, at the beginning, at the end, or anywhere in the middle. When a fixture is assigned a DMX address of 1, the DMX controller knows to send DATA assigned to address 1 to that unit, no matter where it is located in the DMX chain.

DATA cable (DMX cable) requirements (for DMX operation):

This fixture can be controlled via DMX-512 protocol. The DMX address is set on the back of the unit. Your unit requires either a standard 3-pin or 5-pin XLR connector for data input/output, see images below.

Further DMX cables can be purchased from all good sound and lighting suppliers or Prolight Concepts dealers.

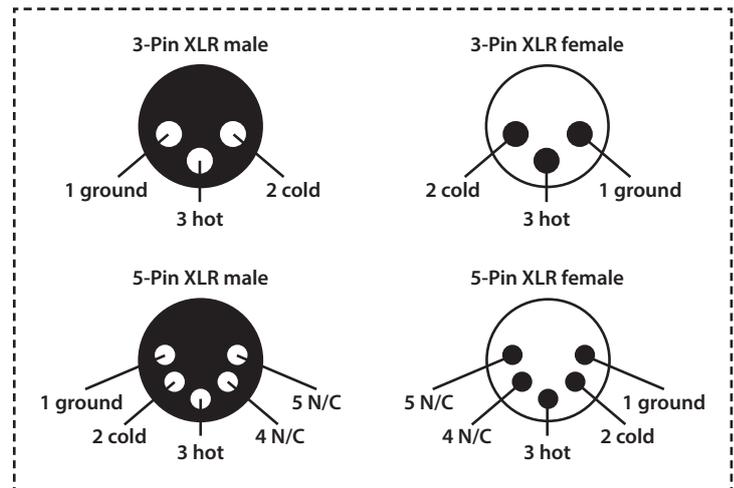

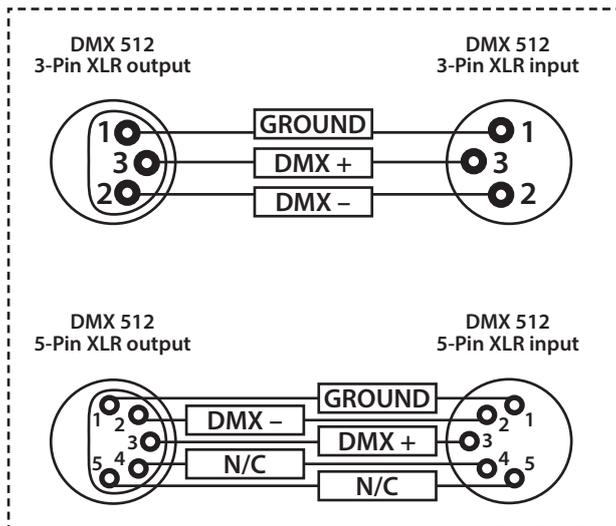

Please quote:	3-Pin:	CABL10 – 2m	CABL11 – 5m	CABL12 – 10m
	5-Pin:	CABL185 – 2m	CABL187 – 5m	CABL188 – 10m

Also remember that DMX cable must be daisy chained and cannot be split.

Notice:

Be sure to follow the diagrams below when making your own cables. Do not connect the cables shield conductor to the ground lug or allow the shield conductor to come in contact with the XLRs outer casing. Grounding the shield could cause a short circuit and erratic behaviour.

Pin Configuration	
3-Pin	5-Pin
	Pin 1 - Ground
	Pin 2 - Negative
	Pin 3 - Positive
-	Pin 4 - N/C
-	Pin 5 - N/C

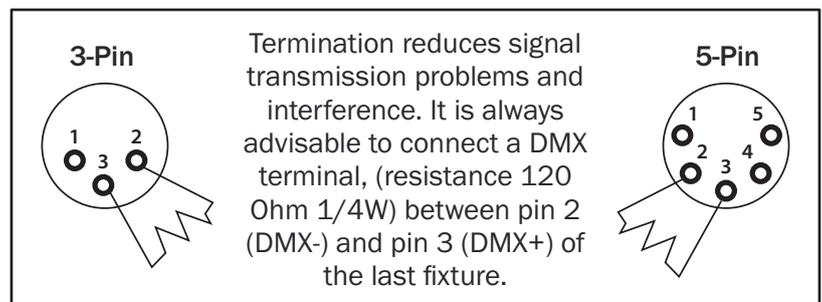

Line termination:

When longer runs of cable are used, you may need to use a terminator on the last unit to avoid erratic behaviour.

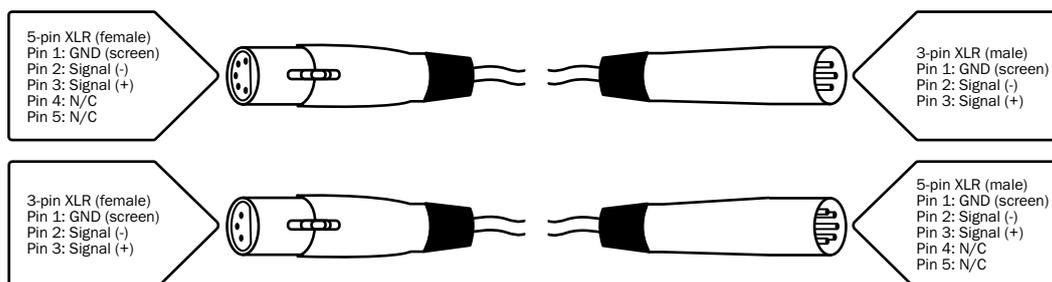

Using a cable terminator will decrease the possibilities of erratic behaviour.

(3-pin - Order ref: CABL90,
5-pin - Order ref: CABL89)

5-pin XLR DMX connectors:

Some manufactures use 5-pin XLR connectors for data transmission in place of 3-pin. 5-pin XLR fixtures may be implemented in a 3-pin XLR DMX line. When inserting standard 5-pin XLR connectors in to a 3-pin line a cable adaptor must be used. The diagram below details the correct cable conversion.

Correct Disposal of this Product (Waste Electrical & Electronic Equipment)

**(Applicable in the European Union and other European countries
with separate collection systems)**

This marking shown on the product or its literature, indicates that it should not be disposed of with other household wastes at the end of its working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate this from other types of wastes and recycle it responsibly to promote the sustainable reuse of material resources.

Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take this item for environmentally safe recycling.

Business users should contact their supplier and check the terms and conditions of the purchase contract. This product should not be mixed with other commercial wastes for disposal.
